# Atollon Innovations 2020 (week 12)

New Features

Calendar

- CalDAV access now supports **read/write mode** - you can use your calendar on CalDAV compatible device - that means **iPhone**, **Apple Calendar** natively and other calendars using many CalDAV plugins available for **Android**, **MS Outlook**, etc.

Major Updates

Mail

- New MTA (Message Transfer Agent) for e-mail delivery is now Exim (rest in peace qmail)
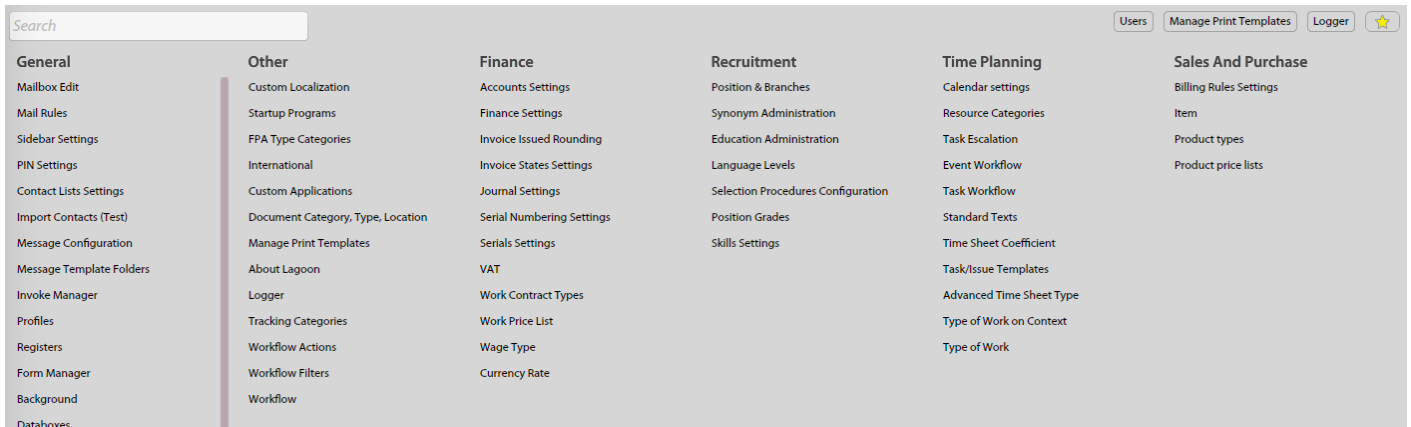

Enhancements

Contacts

- Contact relations now work even on large companies - relations settings have been enhanced and separated

Desktop

- Many visual performance optimizations
- New Options & Tools application, now allows quick search in settings (oh, there are so many things that you can customize, we need to be albe to search them ...)

- Now it is possible to auto-generate forms to be filled-in online (contracts, etc.) even using Desktop app

Deals

- Improved handling of foreign currency deal values - preparation for new deals views (calculation of foreign vs local deal value)
- It is now possible to create Invoice directly from Sales items

Purchase Order

- Now default supplier of product is added automatically

Products

- Export and import tools simplified
- Product units settings now available in user interface
- It is now possible to configure default product type and product status
- New base type of product is Service, with period from .. to definition on invoice

Invoice

- Improved sorting invoices by any field in various column order
- Improved checking available invoice numbers (for clients who manage multiple providers in one Atollon)

- Improved sending invoice in e-mail - better attachment name, recipients selected automatically
- It is possible to configure "invoicing e-mail" address in contacts, which is preferred when sending invoices
- It is possible to configure Invoice required fields (to help unorganized sales people issue properly filled-in invocies)
- Multiple user interface improvements to make your invoicing work easier
- It is possible to open context (client, project, activity) from Invoice detail even when it's disabled

Recruitment

- New option to set min/max salary visibility in Job Advertisement
- Improved user experience on entering various details on Applicant profile

Tasks

- It is possible to open context (client, project, activity) from Task detail even when it's disabled

Bug Fixes

- Budgeting - fixed displaying "remaining" column indicating how many items remain to be allocated to projects
- Contacts - major performance improvements in contact detail
- Desktop - some application icons were not displayed correctly and now they are
- Documents - upload multiple documents feature and some visual bugs on upload component fixed
- Mail - delivery of e-mails now fixed even for deleted user's mailboxes
- Mail - fixed nightly mail cleanup to reduce server workload
- Mail - auto-response encoding fixed (now diacritics work as they should)
- Tree - nasty bug causing module instability found & fixed
- Invoice - printing large documents now available again
- Invoice - fixed refresh of form data on project when printing invoice / order / estimate
- Workflow - fixed administration of Workflow Actions
- Recruitment - fixed saving education and employment relations after major innovations
