- Expanded **translations** for product-related labels across multiple languages.
-

Enhancements

Contacts Loading

- Contact lists now **load faster**, even for large databases, thanks to new **pagination and background loading**.
- Improved **search speed**, added **loading indicators**, and enhanced **error handling** for smoother navigation.

Tracking Categories Support

- Added support for **Tracking Categories** to better organize data in activities, projects, and folders.
- Tracking options now appear in relevant dropdowns, filtered automatically based on context.
- Improved **data consistency and accuracy** by aligning tracking categories with dimension settings.

User Interface & Usability

- Improved **Finder** and **Sidebar** layouts for easier navigation and resizing on touch devices.
 - Standardized form and picker widths across billing, expense, and timesheet sections for a more consistent look.
 - Enhanced **overall responsiveness**, ensuring clean layouts on mobile and tablet screens.
-

Bug Fixes

- Fixed issues causing **missing or incorrect contact data** during selection.
 - Corrected **date format** inconsistencies (now DD.MM.YYYY).
 - Fixed **layout and overflow** problems in Finder and Timesheet components.
 - Improved **translation accuracy** for Czech localization.
 - Removed unused console logs and resolved minor **runtime and styling errors** for a smoother experience.
-
