Unified Order Management: Estimates, Sales Orders, Purchase Orders, Offer Received

- **Standardized Interface:** All order types now share a consistent, modern web design for easier navigation.
- **Split-Screen Editor:** Efficiently manage your document list and detail side-by-side.
- **Dynamic Document Handling:**
 - **Sales Orders:** Manage client commitments and track expected delivery.
 - **Purchase Orders:** Streamline procurement and supplier communication.
 - **Offer Received:** Track and process incoming vendor proposals.
 - **Real-time Calculations:** Automatic updates for VAT, totals, and currency conversions across all documents.

The screenshot displays a software interface for managing price quotations. On the left, a sidebar contains filters for 'Status' and 'Payment status'. The main area is split into two panes. The left pane shows a list of quotations with columns for 'Name', 'Date', and 'Total'. The right pane provides a detailed view of a selected quotation, including fields for 'Journal', 'Currency', 'Issue Date', 'Valid until', 'Supplier', 'Customer', and 'Notes'. Below these fields is a table of items with columns for 'Name', 'Code', 'Unit price', 'Qty.', 'VAT', 'excl. VAT', and 'incl. VAT'. The total value is shown as 2,000.00 CZK.

Atollon Innovations (week 19)

New Features

Calendar

- Added a full calendar view with month, week, and day layouts.
- Added a calendar user switcher for viewing other users' calendars.
- Added a CalDAV settings dialog for syncing external calendars.
- Added a change password dialog accessible from the user header.

Communication and Messaging

- Added a dedicated Message Move dialog for moving messages between contexts.
- Added a Resolve Message Options dialog to handle status changes on resolution.
- Added an Email Sender Contact Badge that surfaces matching contacts inline in the message list.
- Added bulk selection of messages through a reusable Bulk Select Checkbox component.
- Added a Duplicate Contact modal triggered during new contact creation.

Invoices

- Added an Invoice Timeline view for chronological tracking of invoice events.
- Added an Invoice Communication view for invoice-related messages.
- Added an Invoice Documents view for related document handling.
- Added tracking code and company info resolution based on VAT and registration numbers during invoice context creation.

Projects and Activities

- Added a Change Project Type dialog with full type-switch workflow.

- Added "Move Project" and "Move Activity" actions.
- Added billing and product filter controls to the filter renderer.
- Added text and numeric filter controls to the filter renderer.

Tasks and Issues

- Added a dedicated Task Timeline view.
- Added a dedicated Issue Timeline view.

Enhancements

Calendar

- Improved calendar responsiveness across desktop, tablet, and mobile.
- Improved calendar header, filter, and date picker components.
- Improved the events list with richer card content and table view.
- Improved Add/Update Event flow with additional fields and validation.
- Improved calendar app integration up to release candidate 3.

Communication and Messaging

- Improved the new message dialog and composer, including a redesigned layout and editor.
- Improved comment chat window with richer formatting and event handling.
- Improved messages component, messages card components, and swipeable mobile rows.
- Improved communication list and communication menu navigation.
- Improved message resolution utilities and compose send pre-flight checks.
- Improved TinyMCE editor integration and configuration.

Invoices

- Improved Add/Update Invoice form with refined bank, supplier, transaction, and comment sections.
- Improved invoice card and detail components for clearer status presentation.
- Improved customer and supplier dropdowns within invoice forms.
- Improved invoice filter component behavior.

Contacts and External Contacts

- Improved External Contacts component, contact card, and contact creation flow.
- Improved Contact Detail view and mobile detail view.
- Improved Contact Relationship wrapper and relations detail components.
- Improved Contact Timeline view across desktop and mobile.
- Improved Company Name dropdown and add-company / add-person flows.

Filtering and Views

- Improved Filter Search Text Box parameter handling and readability.
- Improved Filter Control Renderer with refined folder filter pattern handling and category extraction.
- Improved Filter Controls and Quick Filter Controls for project and service activities.
- Improved Project Activities view loading and data hook.
- Improved Standard Status Filter dropdown and item type filter components.

Header Toolbar and Navigation

- Improved Activity, Folder, and Project components in the header toolbar.
- Improved Status Pipeline Toolbar and FPA status button.
- Improved buttons component and header toolbar layout consistency.
- Improved Finder context tree, finder details, and finder layout.

Mobile and Layout

- Improved App Tab Container and App Menu for mobile, including new container item styles.
- Improved Mobile Menu navigation and User Header / User Navigation Mobile.
- Improved mobile detail views in project activities and service activities.
- Improved Reef Timeline view shared across modules.
- Improved Tabs Layout component spacing and behavior.

Products and Project Items

- Improved Product Component, Product Detail view, and Product Detail mobile view.
- Improved Project Product tree, new activity add/edit, and tree component.
- Improved Project Item Grid with refined column handling.
- Improved Numeric Text Field and ComboBox cell editor in tree grids.
- Improved Activity, Billing, Expense, and Timesheet line components.

Context and Search

- Improved Context Selection with new icons, improved selection state, and richer types.
- Improved Context Search state and FPA list request integration.
- Improved Context New dialog with additional fields and contact-type wiring.
- Improved Context Move dialog and added success-effect handling.

Localization

- Improved Czech translations across calendar, contacts, invoice, common, and layout modules.
- Improved English translations for invoices, layout components, and contacts.
- Improved Bulgarian, German, French, Spanish, Italian, Polish, Romanian, Russian, Slovak, Ukrainian, and Arabic invoice translations.
- Improved multilingual consistency of labels, statuses, and form text.

Bug Fixes

- Calendar: Fixed responsiveness, header layout, filter handling, and event detail behavior.
- Calendar: Fixed event work-type filter and FPA list dropdown issues.
- Messaging: Fixed email composition issues including attachments, settings, and pre-flight handling.
- Messaging: Fixed message list rendering, swipeable mobile row behavior, and card component styles.
- Messaging: Fixed new message component and dialog state handling.
- Invoices: Fixed invoice transaction, supplier, and bank section inconsistencies.
- Invoices: Fixed customer and supplier dropdown duplication.
- Invoices: Fixed translation keys across all supported invoice locales.
- Contacts: Fixed external contact creation, contact detail rendering, and relations refresh.
- Contacts: Fixed contact card and context menu button behavior.
- Filtering: Fixed filter renderer issues with folder, billing, and product filters.
- Filtering: Fixed quick filter control synchronization in service activities.
- Header Toolbar: Fixed Activity, Folder, and Project component layout and behavior.
- Header Toolbar: Fixed status pipeline toolbar and FPA status button rendering.
- Mobile: Fixed App Tab Container and App Menu Mobile navigation issues.
- Mobile: Fixed mobile detail view layout in project and service activities.
- Projects: Fixed Project Item Grid behavior and column rendering.
- Projects: Fixed product line, billing line, expense line, and timesheet line components.
- Tasks and Issues: Fixed task and issue detail views, including create-issue dialog and add/update task flows.
- Documents: Fixed Document Create/Update form behavior.

- PDF: Fixed PDF rendering errors by falling back to the native viewer.
- Forms: Fixed form view rendering and updated form service handling.
- Finder: Fixed finder context tree behavior and details panel layout.
- Localization: Fixed Czech translations in layout components, invoice, and common modules.
- Build: Fixed build issue caused by a missing focus dependency.

Atollon Innovations (week 14)

New Features

Invoices

- Added invoice print functionality with context-aware print type handling.
- Added sorting and template selection logic for invoice printing.
- Added exchange rate hint display in invoice detail.
- Added automatic due date calculation based on customer due days.
- Added support for additional invoice status and payment status options.
- Added context-aware invoice wrapper support in the main application layout.

Tasks and Issues

- Added Issue module support with create, update, delete, and list operations.
- Added dedicated task timeline view.
- Added dedicated task documents view.

Documents

- Added document deletion directly from document preview.
- Added a toolbar to document preview for easier navigation.

Sales Items and Project Items

- Added unit price and quantity columns to sales item creation.
- Added serial number support in project item workflows.

Enhancements

Invoices

- Improved invoice state handling and data consistency across invoice screens.
- Improved invoice detail, transaction, supplier, shipping, finance, and comment sections.
- Improved handling of organization default currency and currency rate normalization.
- Improved journal resolution and invoice print type resolution.
- Improved invoice filtering and invoice-related layout integration.
- Improved mobile responsiveness of invoice detail and edit screens.
- Improved invoice document handling and refresh behavior.

Deals, Estimates, and Order-Related Foundations

- Improved pricing data handling through unit price, quantity, and currency support in item workflows.
- Improved numeric formatting and readability in project item grids.
- Improved item and transaction structures used by sales-related workflows.

External Contacts

- Improved external contacts normalization, retrieval, update, and save logic.
- Improved support for updated external contact data structures across related components.

Forms and Data Handling

- Improved dynamic form rendering based on form definitions.
- Improved form value handling, persistence, and full-object updates.
- Improved handling of pending edits and required field validation.
- Improved save performance through debounced operations.

Filtering and Views

- Improved advanced filtering, including relative date preset normalization.

- Improved custom views, filter synchronization, and layout orientation handling.
- Improved current-user filtering behavior.

Navigation and Layout

- Improved context-aware breadcrumbs and navigation behavior.
- Unified timeline views across multiple modules.
- Improved responsiveness and layout consistency across desktop, tablet, and mobile screens.

Localization

- Improved Czech translations across calendar, contacts, issues, invoices, and related modules.
- Improved multilingual consistency of labels, statuses, and messages.

Bug Fixes

- Invoices: Fixed inconsistencies in invoice transaction display, printing logic, and context handling.
- Forms: Fixed item identification issues by using the correct ID field during retrieval.
- Forms: Fixed required field validation and unsaved changes handling.
- Tasks and Issues: Fixed status handling and read-only behavior in selected task-related forms.
- Filtering: Fixed filter persistence, synchronization, and re-rendering issues.
- External Contacts: Fixed data structure inconsistencies affecting contact updates.
- Documents: Improved error reporting in message and document-related operations.
- Tree and Grid Views: Fixed keyboard navigation, editing behavior, and responsive layout issues.
- Localization: Fixed and refined Czech translations in multiple modules.
