

Execute Workflow Actions Immediately

In case your integration requires executing workflow actions immediately after your request, it is necessary to call **CheckWorkflowQueue** function that is part of **features.wsdl**.

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:wsdl="http://atollon.com/enterprise/wsdl">
  <soapenv:Header />
  <soapenv:Body>
    <wsdl:CheckWorkFlowQueue>
      <server>yourserver</server>
      <session>--- yoursessionstring--- </session>
    </wsdl:CheckWorkFlowQueue>
  </soapenv:Body>
</soapenv:Envelope>
```
