Execute Workflow Actions Immediately

In case your integration requires executing workflow actions immediately after your request, it is necessary to call **CheckWorkflowQueue** function that is part of **features.wsdl**.

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:wsdl="http://atollon.com/enterprise/wsdl">
    <soapenv:Header/>
    <soapenv:Body>
        <wsdl:CheckWorkFlowQueue>
            <server>yourserver</server>
            <session>---yoursessionstring---</session>
        </wsdl:CheckWorkFlowQueue>
    </soapenv:Body>
</soapenv:Envelope>
```
