

Global Corporate CSS Settings

This requires more advanced approach:

The Default Corporate CSS:

```
/* =====  
Corporate Document CSS – Generic Theme (Colors Only)  
-----  
Preset Color Definitions:  
- Primary   (#455A64): Headings, table headers, key dividers  
- Secondary (#ECF0F1): Light backgrounds and contrast text  
- Font      (#36464F): Default body text  
- Accent    (#F5F7F8): Highlights, totals, emphasis  
- Border    (#71ABCB): Table borders & separator lines  
===== */  
  
/* Font color */  
.document {  
  color: #36464F; /* Font */  
}  
  
/* Headings */  
h1, h2, h3,  
.project-box h2,  
.heding-mean {  
  color: #455A64 !important; /* Primary */  
}  
  
/* First horizontal divider */  
.top-table {
```

```
border-color: #455A64 !important; /* Primary */
}

/* Table headers */
th {
background-color: #455A64 !important; /* Primary */
color: #ECF0F1 !important; /* Secondary */
}

/* Table borders */
td, th {
border-color: #71ABCB !important; /* Border */
}

/* Totals / highlights */
.table-highlight,
.summary,
.total-row {
background-color: #F5F7F8 !important; /* Accent */
}

/* Separator lines */
hr, .line, .separator {
border-color: #71ABCB !important; /* Border */
}

/* Buttons */
.button {
background-color: #F5F7F8 !important; /* Accent */
color: #36464F !important; /* Font */
border-color: #71ABCB !important; /* Border */
}
```

Create Global Text in SOAP

```
select id from languages where iso_short = 'en';
```

Then:

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:wSDL="http://atollon.com/enterprise/wSDL">
  <soapenv:Header/>
  <soapenv:Body>
    <wSDL:CreateGlobalText>
      <server>SERVERNAMEHERE</server>
      <session>xxx</session>
      <identification>invoice-global-CSS</identification>
      <LANG>
        <id>131514101</id>
        <value>/* Corporate Document CSS - Focused on Colors */

/* Preset Color Definitions:
  - Primary color (#455A64): Used for main headings, table headers
  - Secondary color (#ECF0F1): Used for backgrounds and contrast elements
  - Font color (#36464F): Default text color
  - Accent color (#F5F7F8): Used for highlights, buttons, totals
  - Border color (#71ABCB): Used for table borders and separator lines
*/

/* Document Background and Font Color */
.document {
  /* background-color: #ECF0F1; Optionally, secondary color for clean, neutral background */
  color: #36464F; /* Font color for readability */
}

/* Heading Colors */
h1, h2, h3 {
  color: #455A64; /* Primary color to emphasize headings clearly */
}

/* Table Header Colors */
th {
  background-color: #455A64; /* Primary color for contrast and clarity */
  color: #ECF0F1; /* Secondary color for contrasting readable text */
}

/* Table Border Colors */
td {
```

```
border-color: #71ABCB; /* Border color to subtly separate table cells */
}

/* Invoice Totals and Highlights */
.table-highlight {
background-color: #F5F7F8; /* Accent color to draw attention to important totals */
color: #ECF0F1; /* Secondary color to ensure readability against accent background */
}

/* Separator Lines */
hr, .line {
border-color: #71ABCB; /* Border color for gentle visual separation */
}

/* Button Colors */
.button {
background-color: #F5F7F8; /* Accent color for action buttons to stand out */
color: #ECF0F1; /* Secondary color to ensure text readability on buttons */
}</value>
</LANG>
</wsdl: CreateGlobalText>
</soapenv: Body>
</soapenv: Envelope>
```

Corporate CSS styles by document type

Document type	Global Text Identification
Invoice	invoice-global-CSS
Activity	activity-global-CSS
