Configure Application Forms

Form Settings tool allows you to configure what **fields** are used (visible) on **New contact** form(s), both Company & Person or **Invoice Issued**.

System administrators (users that are "admins") with the appropriate access rights may configure the visibility & obligation of the user(s) to fill-in the form fields. This is especially useful when the default setting do not fit your needs.

You can find **Form Settings** in **Options & Tools** or on New contact form.
