

Fix Atollon Protocol

Bacillus

On Mac OS X, it may happen that atollon:// protocol is not working properly. Ie you can not open links with Desktop app.

Treatment

You can fix your Atollon protocol by following next steps:

1. download fix script [FixAtollonProtocol.command](#)
2. open Terminal (go to Cmd + Shift + U)
3. drag & drop the command file to Terminal
4. change the permissions of the file: `chmod a+ x FixAtollonProtocol.command`
5. run the `FixAtollonProtocol.command`
