

Message Configuration

Message Configuration options allows you to configure different message types as per your requirements.

1. Go to **Options & Tools**

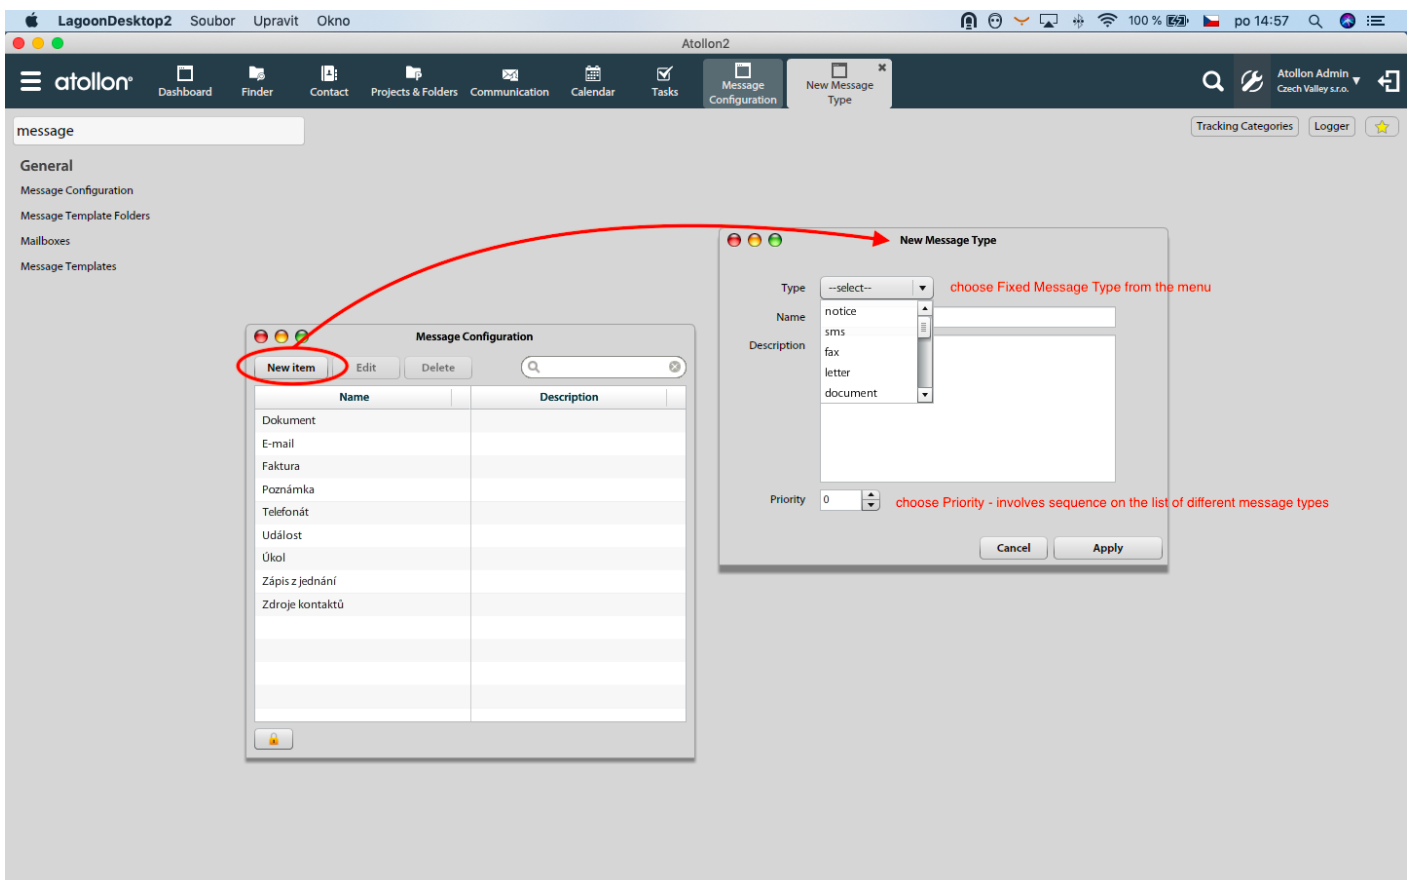

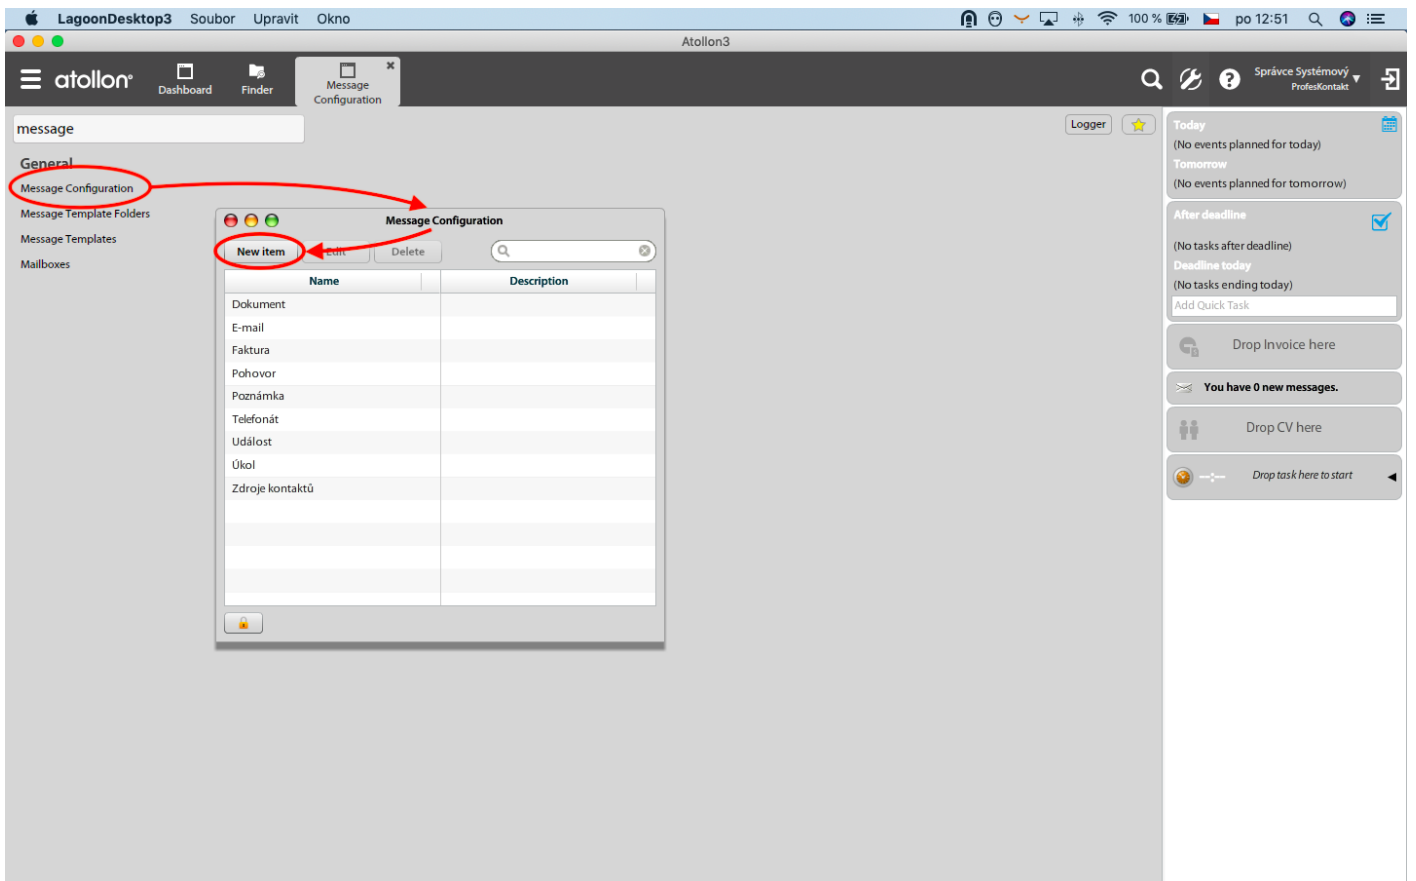

2. Type "message" into the text field there, the application will filter only those settings relating to messaging

3. Choose **Message Configuration** option, in order to call for appropriate dialog

4. Use the buttons in dialog as per your need

- create new item (new message type)
- edit existing item
- delete exiting item
