Redirect existing mail address

In windows client

1. **Setting -> Mail -> Mail boxes ->** doubleclick user to be redirected -> set combobox Active to No.
2. **Scribe down** (to notepad or piece of paper) users mail (just the name - part before @) and its aliases.
3. **Setting -> Mail -> Mail boxes ->** doubleclick user to redirect to -> push "+" button in Aliases section -> fill up user aliases which you were scribbing down
